2007-2018	\$ 16,289,064.00	\$8,144,532.00

White County has been Illinois' top oil producing county for several years, producing nearly 2 million barrels in 2018. The county's prolific oil production reserves were responsible for approximately **11 percent** of the county's overall property tax revenue from 2007-2018, totaling **more than \$16.2 million**. IPRB conservatively estimates that at least **\$8.1 million** of that revenue went to fund the county's three primary public school districts: Carmi-White County CUSD #5, Norris City-Omaha-Enfield CUSD #3 and Grayville CUSD #1 - which have a combined 2,437 students.
