2007-2020	\$ 20,596,260.00	\$ 10,298,130.00

White County has been Illinois' top oil producing county for several years, producing [more than 2 million barrels](#) a year from 2019-2021. The county's prolific oil production reserves were responsible for approximately 11 percent of the county's overall property tax revenue from 2007-2020, totaling more than \$20.5 million. IPRB conservatively estimates that at least \$10.25 million of that revenue went to fund the county's three primary public school districts: Carmi-White County CUSD #5, Norris City-Omaha-Enfield CUSD #3 and Grayville CUSD #1 - which have a combined 2,400-plus students.
